Tala Altamimi

Qassim, Saudi Arabia | +966558696116 | talaaltamimiofficial@gmail.com | LinkedIn Profile

Professional Summary

Fresh Architecture Graduate specializing in architectural design and urban planning, with a strong foundation in sustainable architecture and culturally responsive design. Skilled in developing innovative design concepts that integrate Saudi architectural heritage with contemporary principles, aligned with Saudi Vision 2030. Recognized for achievement in a national digital innovation competition, with proficiency in advanced design software, project coordination, and design development. Possesses strong analytical, communication, and teamwork skills, with a commitment to creating functional, sustainable, and impactful built environments.

Education

Bachelor of Architecture | Onaizah Colleges, Al-Qassim – Ar Rass | GPA: 4.74/5 | Graduation: 2026

Courses & Certifications

- Saudi Building Code Requirements for Lighting, Ventilation, and Energy Efficiency in Modern Buildings | Professional training provided by the Saudi Council of Engineers.
- Sustainability and Innovation in Industrial Applications | Professional training provided by the Saudi Council of Engineers.
- Project Performance Indicators: From Measurement to Performance Improvement | Professional training provided by the Saudi Council of Engineers.
- Safe Work Practices and Risk Prevention | Professional training provided by the Saudi Council of Engineers.
- Foundation Engineering: From Principles to Design and Construction Practice | Professional training provided by the Saudi Council of Engineers.
- Environmental Skills for Engineers Toward Sustainable Projects | Professional training provided by the Saudi Council of Engineers.
- Smart & Connected Low Voltage Systems | Professional training provided by the Saudi Council of Engineers.
- Creative Innovation Bootcamp | Intensive training program focusing on innovation and design thinking.
- National History Lab | Comprehensive program on Saudi history and heritage preservation.

Academic Projects

"Coralia" – Red Sea Discovery Hub | Graduation Project | June 2026

- Developed a multidisciplinary architectural project focused on exploring, preserving, and showcasing the Red Sea's unique marine biodiversity through an integrated educational and discovery environment.

"Seavida" – Red Sea Resort | Jeddah | December 2025

- Developed a luxury island resort concept inspired by the Red Sea's marine environment, integrating contemporary hospitality design with coastal landscape and sustainable design principles.

"An Nakheel" – Mixed-Use Development | July 2025

- Developed a contemporary mixed-use architectural concept inspired by Najdi architecture and Salmani principles, integrating traditional Saudi architectural identity with modern design approaches.

Skills

Architectural Competencies:

- Architectural Design | Urban Planning | Interior Design | Sustainable Architecture | Space Planning

Technical Skills:

- AutoCAD | Revit | SketchUp | Lumion | Adobe Photoshop | Adobe Illustrator

Professional Skills:

- Project Coordination | Design Development | Problem Solving | Time Management | Communication | Teamwork

Achievements

- 5th Place – National Laboratory Competition, King Abdulaziz Foundation
- Selected among the top 6 nationwide participants.

Languages
